

# OUR NEXT GIGAWATT

Join Us in Democratizing the Benefits  
of Utility Scale Clean Energy & Storage

1.2 GW Contracted  
\$1.5B Invested  
30+ VPPAs

## WHAT IS NZCB?

### The Net Zero Consortium for Buyers

The NZCB is a confidential, invitation-only, buyers' community for Advanced Market Commitments (AMCs) to democratize global utility-scale clean energy. Managed by a full-time team of dedicated SR Inc staff members, we empower leading enterprises to aggregate their buying power and gain commercial access to transactions and markets that would've otherwise been out of reach alone.

### Purchaser-Caused EACs

Unequivocal claim to having caused additional clean energy capacity

### Buyer Aggregation

Market access to high-quality utility-scale projects with smaller minimums (5-50 MWs)

### Risk Mitigation

Diversified portfolios across projects, technologies, markets, and timelines

### Global Scope

Multiple buyer-directed aggregations throughout the year in major global markets

SR Inc's approach and deep expertise have earned our trust as a partner in our renewable electricity procurement journey. They consistently demonstrate that they have the best interests of the buyers at heart, providing proposal evaluations and risk assessments that is equal to or better than competitors with whom we have worked.
